

Year 5 Learning

Summer term w/c 15th June

Good morning Year 5. We hope you're all keeping well at home. We understand that doing home learning for the past few months has had its challenges and there's days where you may not feel up to it but keeping going. We're really PROUD of you all. We've set quite a bit of learning here so please do what you can, when you can.

We know you don't always want to share your learning but if you could email us any, we'd be delighted to see it. Remember you can also say hello to your classmates on the padlet. <https://en-gb.padlet.com/gsmith89/W5>

English

Alongside the bitesize learning on offer, we would like you to investigate how animals coped during lockdown.

We discovered that in India, monkeys ate bananas in the middle of deserted main roads and cows just chilled out on their version of motorways!

Check out the example that Mr Brown produced for an idea to get you started. More importantly, you'll see that although lockdown was different for many, some animals got to experience a calmer world.

Build your own Theme Park!

Sounds cool, doesn't it? We've attached the first lesson, along with some examples, of the Theme Park that we're 'building' in school. The lesson has a heavy maths theme but is good fun and you can design your own Theme Park.

Will your park be an attraction for adults or children? Will you have water rides galore or will it just be thrill-seeking rides?

If you enjoy it, we'll post the remaining lessons next week.

Reading

Alongside any other reading at home, we'd like you to have a read of the fantastic book we're reading in school called: 'Stranger Days in Peculiar Hill.'

We've attached the first four chapters, alongside the comprehension activities we've been doing.

Be warned – it's strange and peculiar!

Maths

Arithmetic! It's vital to your maths that you're continuing with your learning of questions involving addition, subtraction, multiplication and division. This will really help you when we do all see you next.

We will attach some more Fluent in Five from Tuesday.

In the meantime, alongside bitesize, check out the two maths investigations!
