

How many triangles can you see in this picture?

Remove just 4 matches to leave 4 equilateral triangles – they must be all the same size.

Start at the bottom left square and move up, down, left or right until you reach the finish.

	4	9	7	7	4	Finish
	8	9	4	5	7	
	6	6	4	9	9	
	7	8	8	8	6	
Start	5	5	6	5	5	

Add the numbers as you go.
Can you make exactly 53 ?

Can you put the digits 1 to 9 in a square so that every row, column and diagonal add to 15?

This example doesn't work:

1	3	5	→9
9	6	4	→19
2	7	8	→17

↙13 ↘12 ↙16 ↘17 ↘15
